

Strengthening Energy Sector Resilience in Jamaica

Resilient Solar and Energy Storage for Jamaican Businesses

With support from USAID, the Jamaican Energy Resilience Alliance (JERA) offers specialized support to businesses seeking to reduce power costs, increase reliability of supply, and green their operations. JERA will help you: understand how solar photovoltaic (PV) systems, including with battery storage (PV+), can benefit your business; navigate the regulatory and installation processes; and access financing from PV+ developer partners with up to USD 50 million of available capital for qualified projects.

WHY SIGN UP?

JERA can offer a range of benefits to your business, including:

Electricity Bill Savings. PV and PV+ can lower how much you pay for electricity, significantly reducing your business's operating costs even while paying back cost of the system.

Resilience. Battery storage provides reliable and resilient back-up electricity, allowing you to continue operating critical systems for periods during grid outages.

Sustainability. Powering your business with clean, renewable energy can help you achieve sustainability goals and speak to an increasingly environmentally conscious customer base.

Competitive Financing. JERA will support you in understanding your range of financing options, including competitive financing offered by JERA partners.

JERA for a Sustainable Jamaica

JERA is supported by USAID to help Jamaica achieve national development goals, including a diversified and resilient energy system through an improved renewable energy enabling environment. The program also aligns with goals set out in Jamaica's *Vision 2030* roadmap, including:

Energy Security and Efficiency by diversifying the energy supply, and

Hazard Risk Reduction and Adaptation to Climate Change by improving resilience to natural disasters and contributing to the effort to combat global climate change.

HOW WE WORK WITH YOU

1. If interested in learning more about your options for PV and PV+, sign up on the [JERA website](#) (URL below). Signing up is no commitment!
2. After signing up, you will be asked to share additional information on your business including: energy bills, business financials (audited if possible), and 15 minute load data (requested from JPS).
3. JERA partners will review your information and contact you for a follow-up conversation to discuss your options for PV and PV+.
4. If your project is eligible for investment from JERA partners, they will work with you through financing and installation options. If not, we will suggest alternative financing options that may better suit your needs.
5. JERA partners will support you through the installation process, including permitting, procurement, and installation.

Stay Engaged!

If you want to learn more about the program and PV+, or get your questions answered directly by JERA partners, visit our website for information on upcoming:

- Virtual informational workshops and events.
- Workshops hosted by outreach partners, including the Jamaica Hotel and Tourist Association (JHTA).
